The rst question is moot here, as this algorithm is precisely Fibonacci's denition of Fn. But the second demands an answer. Let T(n) be the number of computer steps needed to n... And 01

Vazirani is the GOAT. This book reads like him whispering sultrily into your ear. It's actually a joy to read and doesn't "feel like a textbook." The book is surprisingly slim, and the chapters feel just as long as they need to be. He taught my Algorithms class, and a number of our homework problems came from the exercises in this book.
