first part addresses the concept and practical illustrations of a system of systems and is a multidisciplinary introduction to the notion of a system of systems that is discussed extensively in the current scientific and technical literature. After a critical comparison of the different definitions and a range of various practical illustrations, this part provides answers to key questions such as what a system of systems is and how its complexity can be mastered. The second part, described as systems-of-systems engineering: methods and tools, focuses on both engineering and modeling, and standardization issues that are critical to deal with the key steps in systems of systems engineering: namely eliciting stakeholder needs, architecture optimization, integration of constituent systems, qualification, and utilization.

Fortune 500 list as the largest company in the world. Don Soderquist, who was senior vice chairman during that time, played a crucial role in that success. Sam Walton said, "I tried for almost twenty years to hire Don Soderquist . . . But when we really needed him later on, he finally joined up and made a great chief operating officer." Responsible for overseeing many of Wal-Mart's key support divisions, including real estate, human resources, information systems, logistics, legal, corporate affairs, and loss prevention, Soderquist stayed true to his Christian values as well as Wal-Mart's distinct management style.
