Bibliometrics and Research Evaluation takes the reader through the challenges surrounding the use of quantitative indicators in research evaluation, considers the reasons behind their current misuse, and offers proposals and examples of the contributions that indicators can make to the analysis of the dynamics of science and to the evidence base for research policy. It provides a cautionary account that needs to be read by all those involved in the

Bibliometrics and Research Evaluation | The MIT Press
Bibliometrics is hailed as an "objective" measure of research quality, a quantitative measure more useful than "subjective" and intuitive evaluation methods such as peer review that have been used since scientific papers were first published in the seventeenth century.

Bibliometrics and Research Evaluation: Uses and Abuses by ...

Why bibliometrics is useful for understanding the global dynamics of science but generate perverse effects when applied inappropriately in research evaluation and university rankings. The research evaluation market is booming. "Ranking," "metrics," "h-index," and "impact factors" are reigning buzzwords.

Bibliometrics and Research Evaluation - MIT Press
Bibliometrics for Research Evaluation Having been used mainly in the management of library collections of journals and as a source of data for academic research on the development of science, bibliometric tools began to be used for evaluating the productivity and scientific impact of research activities in the 1980s.

Bibliometrics is hailed as an "objective" measure of research quality, a quantitative measure more useful than "subjective" and intuitive evaluation methods such as peer review that have been used since scientific papers were first published in the seventeenth century.

Bibliometrics and research evaluation : uses and abuses ...

Use of bibliometric data to inform an assessment of research performance may be more transparent and less vulnerable to bias than peer review, as well as cost-effective. It is increasingly recognised, however, that no single bibliometric measure is sufficient to assess research quality, and that a subjective element will add depth.
