The engine coolant

## Get Free Engine Oil Sensor In 1996 Ford Explorer

temperature Test Condition is required to ensure enough time has passed since the engine was last stopped. The time period/coolant temperature difference is to allow enough time for the engine oil to drain back into the oil pan. The colder the current engine temperature is, the larger the drop in temperature necessary.

~~Oil Level Sensor? | Cadillac  
Owners Forum~~

The oil pressure switch indicates loss in the engine's oil pressure. Accurate readings from the switch will lead to a smoothly running engine.

~~How To Change an Oil  
Pressure Sensor — YouTube~~

Your oil pressure sensor or  
switch monitors oil pressure  
in your engine. It sends  
these signals to the ECU and  
to your oil pressure gauge  
or warning light. If the oil  
pressure sensor in your  
vehicle stops functioning  
properly, it could give  
false readings. The oil  
light may come on or the  
gauge may read very high or  
at zero.
