Vibration can cause direct discomfort and also create secondary radiation of noise from vibrating walls, floors, piping, etc. In this chapter, sound and noise are used interchangeably, although only unwanted sound is considered to be noise. System analysis for noise control uses the source-path-receiver concept. The source of the sound is the noise-

CHAPTER 48. NOISE AND VIBRATION CONTROL

Noise and vibration normally exist in the operation of a vehicle. When they become unpleasant to the senses they may be regarded as problems by the customer. NVH (Noise, Vibration and Harshness) is the term used when discussing these conditions. Noise, Vibration and Harshness Fig. 1-1 We experience vibration by our senses of touch and vision. We
