This table provides a preferred order to the testing of muscle groups for manual muscle testing. Generally, for bilateral muscle testing, each muscle group is first tested on the right and then the left, prior to proceeding to the next muscle group in the list. Some muscle groups are listed here with anti-gravity testing, but for a weaker patient, these would be tested in a sidelying or supine position, per the table below (Testing Positions); the re-test for a weaker patient is indicated in ...

MMT - Intro to OT Assessment & Intervention

An assessment of muscle strength is typically performed as part of a patient's objective assessment and is an important component of the physical exam that can reveal information about neurologic deficits. It is used to evaluate weakness and can be effective in differentiating true weakness from imbalance or poor endurance. It may be referred to as motor testing, muscle strength grading ...

Muscle Strength - Physiopedia

Manual muscle testing (MMT), which is scored using a 0–5 point Medical Research Council muscle strength scale or a 0–10 point Kendall grading scale and hand-held dynamometry (HHD) which measures the peak isometric force generated from a muscle group, are two common methods to assess muscle strength in therapeutic IM trials.

Manual Muscle Testing Chart -
demo2.notactivelylooking.com

Manual muscle testing is a foundational measure of strength that is widely used across the health professions for both diagnosis and rehabilitation. Yet manual muscle testing has specific limitations, as discussed in Chapter 2. Consequently, alternative strength measures are needed in certain cases such as when strength exceeds a functional ...

Alternatives to Manual Muscle Testing | Musculoskeletal Key
Manual muscle testing: ease of administration, can be administered at any location with any level of strength
Quantitative muscle testing: very objective and reproducible
Hand held dynamometry: objective, easy to use with children
Functional tasks: able to test younger children 7
