The latest edition of an essential text to help students and practitioners distinguish between research studies that should and should not influence practice decisions Now in its third edition, Practitioner's Guide to Using Research for Evidence-Informed Practice delivers an essential and practical guide to integrating research appraisal into evidence-informed practice. The book walks you through the skills, knowledge, and strategies you can use to identify significant strengths and limitations in research. The ability to appraise the veracity and validity of research will improve your service provision and practice decisions. By teaching you to be a critical consumer of modern research, this book helps you avoid treatments based on fatally flawed research and methodologies. Practitioner's Guide to Using Research for Evidence-Informed Practice, Third Edition offers: An extensive introduction to evidence-informed practice, including explorations of unethical research and discussions of social justice in the context of evidence-informed practice. Explanations of how to appraise studies on intervention efficacy, including the criteria for inferring effectiveness and critically examining experiments. Discussions of how to critically appraise studies for alternative evidence-informed practice questions, including nonexperimental quantitative studies and qualitative studies. A comprehensive and authoritative blueprint for critically assessing research studies, interventions, programs, policies, and assessment tools, Practitioner's Guide to Using Research for Evidence-Informed Practice belongs in the bookshelves of students and practitioners of the social sciences.

This Compendium is a comprehensive reference manual containing an extensive selection of instruments developed to measure signs and symptoms commonly encountered in neurological conditions, both progressive and non-progressive. It provides a repository of established instruments, as well as newly-developed scales, and covers all aspects of the functional consequences of acquired brain impairment. In particular, the text provides a detailed review of approximately 150 specialist instruments for the assessment of people with neurological conditions such as dementia, multiple sclerosis, stroke and traumatic brain injury. Part A presents scales examining body functions, including consciousness and orientation; general and specific cognitive functions; regulation of behaviour, thought, and emotion; and motor-sensory functions. Part B reviews scales of daily living activities and community participation. Part C focuses on contextual factors, specifically environmental issues, and Part D contains multidimensional and quality of life instruments. Each instrument is described in a stand-alone report using a uniform format. A brief history of the instrument's development is provided, along with a description of item content and administration/scoring procedures. Psychometric properties are reviewed and a critical commentary is provided. Key references are cited and in most cases the actual scale is included, giving the reader easy access to the instrument. The structure of the book directly maps onto the taxonomy of the influential International Classification of

Functioning, Disability and Health (World Health Organization, 2001), enabling linkage of clinical concepts across health conditions. The Compendium will be a valuable reference for clinicians, researchers, educators, and graduate students, and a practical resource for those involved in the assessment of people with brain impairment. The book is accompanied by a password protected website. For a one-off payment, purchasers of the book can gain online access to the majority of the tests, scales and questionnaires featured in the book as downloadable PDFs. This volume provides a single resource that contains information on almost all of the measures that have demonstrated usefulness in measuring the presence and severity of anxiety and related disorders. It includes reviews of more than 200 instruments for measuring anxiety-related constructs in adults. These measures are summarized in 'quick view grids' which clinicians will find invaluable. Seventy-five of the most popular instruments are reprinted and a glossary of frequently used terms is provided.

Praise for the previous edition "An extraordinary and important book. Its approach to evidence-based practice (EBP) is very sound, realistic, and generous to the complexities of everyday practice. Reading and using this book is a must." □Haluk Soydan, PhD, School of Social Work, University of Southern California "This book has the potential to change practice in the helping professions. Rather than focusing on how to conduct research, Practitioner's Guide to Using Research for Evidence-Based Practice instead shows readers how to understand the literature.... [The] generous use of humor and the inclusion of simple, practice-relevant examples make this book a pleasure to read." □Aron Shlonsky, PhD, Faculty of Social Work, University of Toronto "I particularly like the integration of research methods and EBP; this is the book's major innovation in my mind as it allows readers to see the connections between research and practice. [The book] also succeeds by taking very complex EBP principles and explaining them in practical terms." □Jeffrey M. Jenson, PhD, Graduate School of Social Work, University of Denver Hands-on guidance for research-informed practice and practice-informed research Now in a second edition, Practitioner's Guide to Using Research for Evidence-Based Practice offers a clinician-oriented approach to appraising and using research as part of the EBP process. This accessible guide presents

essential and practical guidance on how to integrate research appraisal into EBP endeavors to determine which interventions, policies, and assessment tools are supported by the best evidence. It introduces: Increased attention to macro-level EBP questions and studies New discussion on defining EBP, including the addition of a transdisciplinary model of EBP More detailed guidance on EBP question formulation and conducting Internet searches, including the PICO framework New content on multivariate designs, including propensity score matching, and on mixed-model and mixed-methods studies
