In twenty-five chapters this book covers phonology, morphology, syntax and semantics. The chapters are organized in four discrete parts: phonology, morphology, syntax and semantics. They are uneven in terms of scope covered, length, the density of their contents and their degrees of difficulty. Each chapter ends with 'Some References' relevant to both the topic(s) treated in the chapter, in Igbo linguistics, and in general linguistics.

How did games rise to become the central audiovisual form of expression and storytelling in digital culture? How did the practices of their artistic production come into being? How did the academic analysis of the new medium's social effects and cultural meaning develop? Addressing these fundamental questions and aspects of digital game culture in a holistic way for the first time, Gundolf S. Freyeremuth's introduction outlines the media-historical development phases of analog and digital games, the history and artistic practices of game design, as well as the history, academic approaches, and most important research topics of game studies. With contributions by André Czauderna, Nathalie Pozzi and Eric Zimmerman.

Blended learning continues to emerge as a more proactive and high quality method of teaching and learning. Yet as the academic landscape shifts towards technology-based efforts, the lack of economic support in developing countries has hindered its educational growth. Advancing Technology and Educational Development through Blended Learning in Emerging Economies provides an insight on blended learning approaches and its importance in the educational development of emerging economies. This book is a vital resource for researchers, academics, professionals, and students involved in the management and organizational development of technology use in educational settings.
